

Shipping in the Arctic – Royal Arctic Line

Short introduction to Royal Arctic Line A/S –

Challenges when operating in Arctic waters and areas.

Change and future in Arctic

And of course, a lot of pictures

Concession on maritime cargo transport to and from Greenland as well as internal in Greenland

Passenger transport internal in Greenland

Operate 13 harbour terminals in Greenland and one in Denmark

Operate 11 vessels, and 5 new buildings in order

Close to 750 employees in total

We are a transport Company !

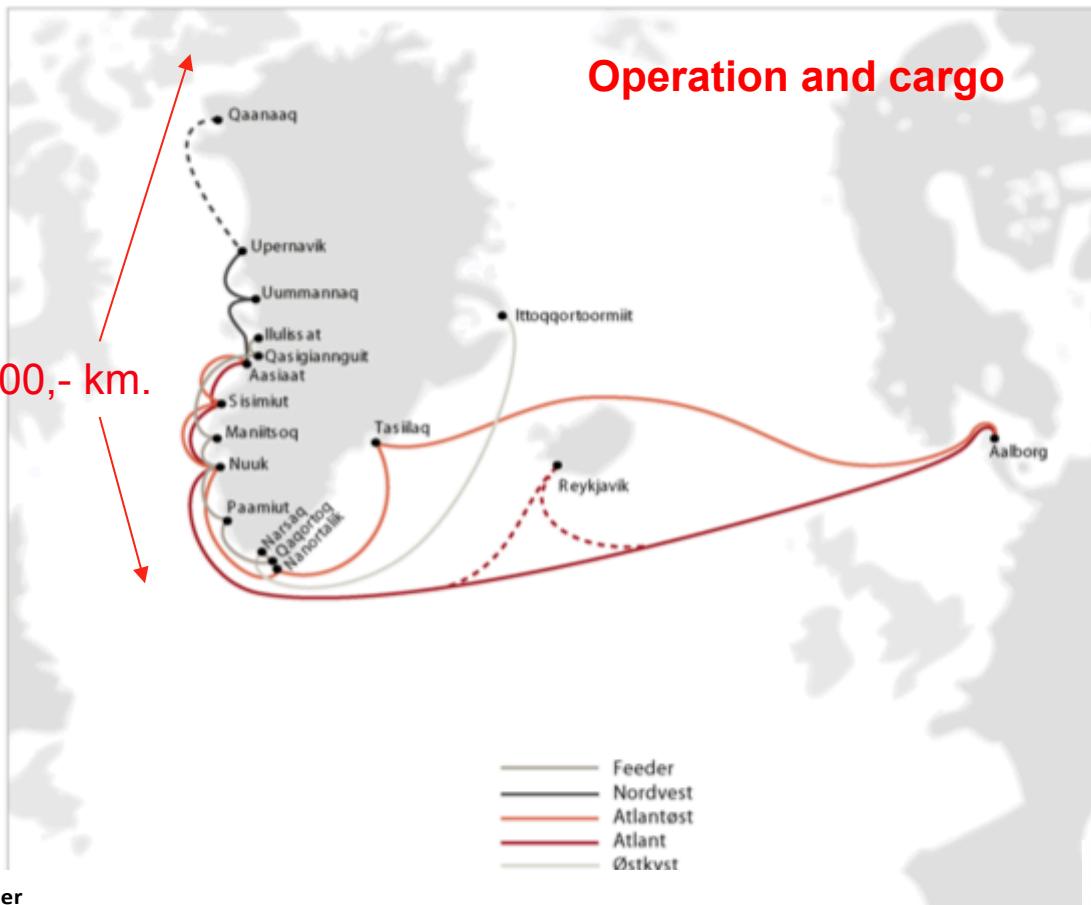

Port of Nuuk

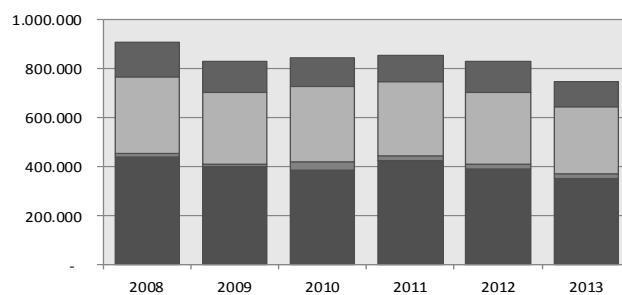

Basic Port - Aalborg

Operation and cargo

App. 2.500,- km.

Godsmængder

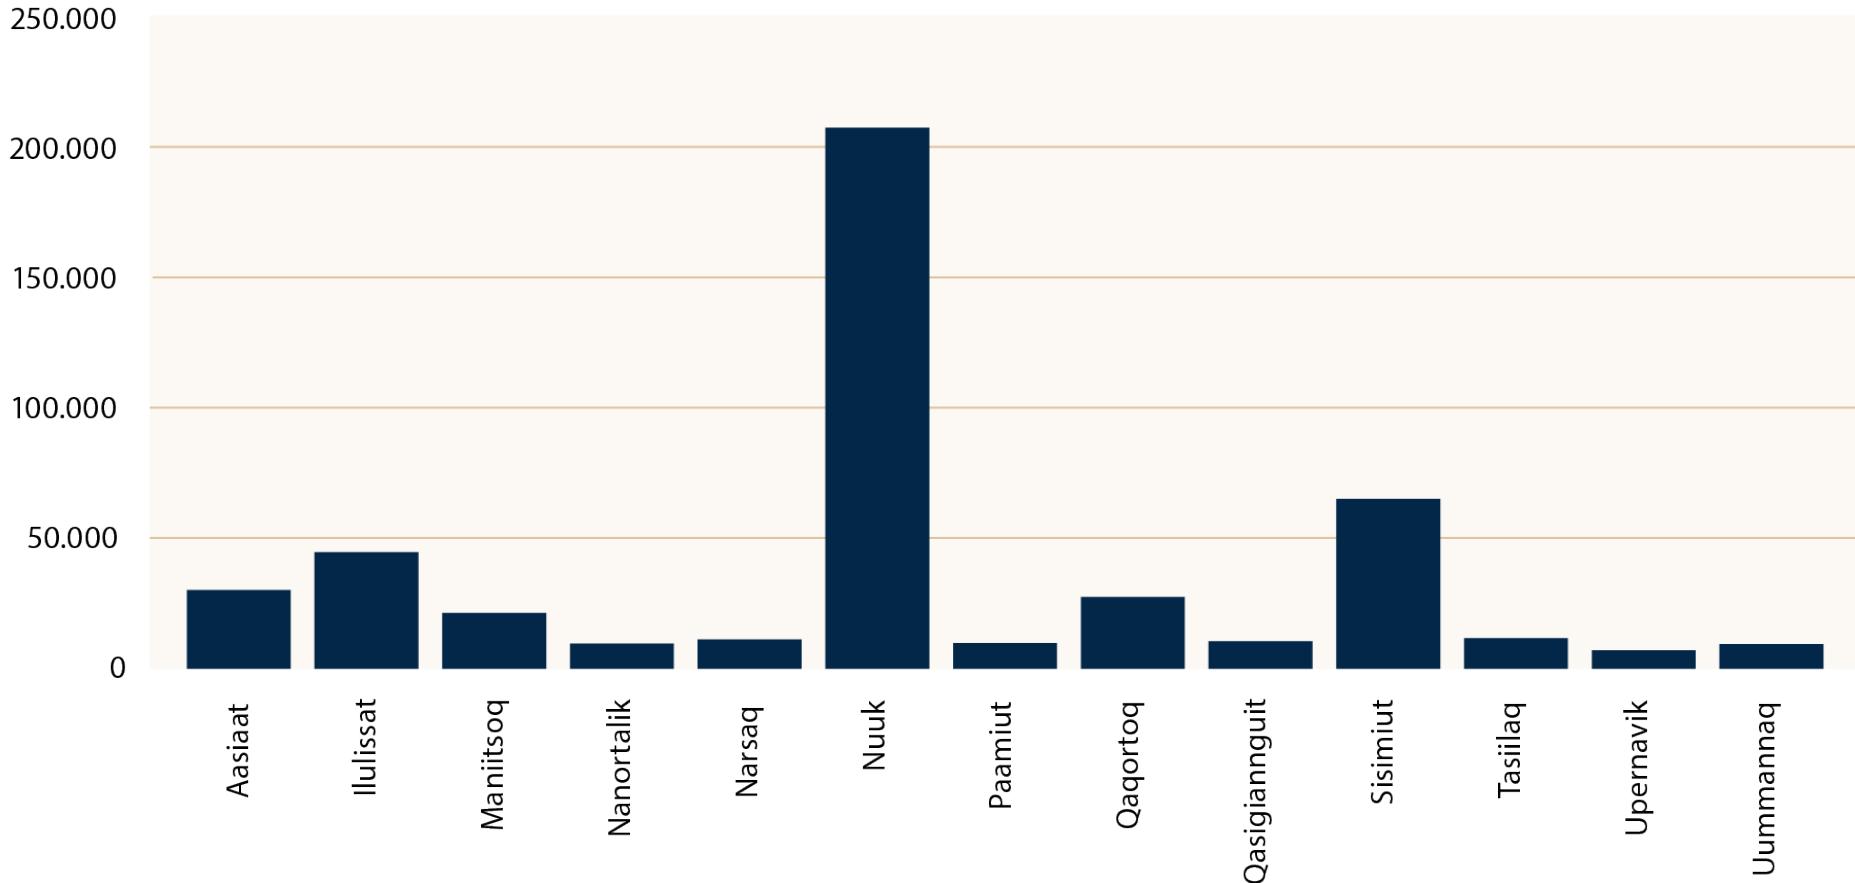

Greenland:

- App. 57.000 inhabitants.
- App. 44.000 km Coastline
- 13 Towns
- 57 Settlements
- No roads between towns and settlements

The drivers in Greenland

Godsmængder i m³ til følgende grønlandske byer

New Buildings in order

Delivery in 2/3 Q 2015

ROYAL ARCTIC

Future in the Arctic

Savings in distance app. ca 4000 nm.
in both cases

Polar Code

IMO !

Flutningar á Íslandi til 2030 - Íslenski sjávarklasinn

ROYAL ARCTIC

Future in the Arctic

- We need the *Polar Code* – regulating the marine industry operating in Arctic and Antarctic waters
- We need focus on Hydrographical operations and focus on SAR capability

We already do see:

- Enhanced traffic due to Mineral and Oil exploration
- Enhanced Cruise, and tourism in larger scale – *no limit traffic*

We expect very soon:

- Increase in shipping passages due to Arctic becomes a destination (shorter transit routes)
- Demands for shipping out of Greenland and other Arctic areas of environmental and ordinary waste

What if...?
